

UVS Section 508 Services & Solutions

Accessibility Compliance Solution

Businesses with inaccessible websites or documents are failing to accommodate a developing portion of the population. According to global statistics, the number of people living with disabilities is expected to grow considerably over the coming decades which may only give rise to further accessibility guidelines, legislation enforcement and increasing fines.

UVS' offer a full-service solution, (Accessibility Compliance as a Service) which has the capability and the capacity to ensure your businesses conforms to accessibility compliance needs without the expensive overhead of maintaining and resourcing individualized accessibility compliance costs. Our proven processes and emerging technologies (AI-driven technique) combination replaces the traditional manual Section 508 assessment certification method into a resource efficient and SLA driven user-responsive solution.

Considering rethinking design and development concept, our goal is to go beyond the limitations of the base level of accessibility and how information is perceived, organized, and provided to users of accessibility content. We ensure that producing a compliant product not only to be accessible but also something of value.

UVS Section 508 Services Key Features

Accessibility Certification Process Management

Section 508 Accessibility office require many barriers to function properly, that significantly may increase costs, consist of lack of process standardization and, lack of required SME knowledge.

UVS Section 508 Services provides expertise advice and knowledgeable Accessibility SMEs to ensure all compliancy is met in a timely manner and elimination of any accessibility barriers.
